SUMMARY

Senior Full-Stack Engineer (PHP/Laravel) with 5+ years building and leading delivery of production SaaS platforms across e-commerce, healthcare, and training - **100+ projects delivered for 50+ clients**. Recently Technical Lead (contract) of a telemedicine platform serving 3,000+ patients and 50+ doctors; currently leading development of a multi-tenant SaaS e-commerce platform serving 1,000+ merchant storefronts. Previously led a 9-person team delivering 15+ projects for clients including Samsung and Philip Morris. Deep production experience in multi-tenant architecture, payments and billing, AI integrations, and AWS/Docker CI/CD.

SKILLS

Backend	PHP 8+, Laravel (Eloquent, Filament, Nova, Horizon, Sanctum, Cashier, Octane, Reverb), REST APIs, queues & job processing, caching, database optimisation, MySQL, PostgreSQL, Redis, WebSockets
Frontend	Vue.js, React, Next.js, TypeScript, Inertia.js, Livewire, Blade, Alpine.js, Tailwind CSS; Flutter (mobile)
DevOps	AWS, DigitalOcean, Laravel Forge & Vapor, Docker, CI/CD (GitHub Actions), Nginx, Linux, load balancing, horizontal scaling, CloudWatch
Quality	Pest, PHPUnit, TDD, PHPStan, Laravel Dusk, SOLID principles, design patterns, clean architecture, security best practices, code review, Agile/Scrum
AI	LLM integrations (OpenAI & Claude APIs), AI chat assistants, AI-assisted engineering
Integrations	Third-party REST API integration, webhooks & event handling, OAuth 2.0, API authentication, rate limiting and retries, payment gateways (Stripe, PayPal), Twilio, Mailgun, WhatsApp Business API, SAML SSO

WORK EXPERIENCE

Technical Lead (Contract) - Afyti Jun 2026 - Aug 2026

Telemedicine platform (iOS/Android apps + web dashboard) · Ramallah, hybrid

- Led a cross-functional team of 5 (engineers, QA, design) building a telemedicine platform serving **3,000+ patients and 50+ doctors**.
- Owned technical architecture, coding standards, and the release process for secure doctor-patient consultations: video calls, scheduling, and medical records.

Full Stack Developer - PalTech Hub Jun 2025 - Present

Multi-tenant SaaS e-commerce platform · remote

- Led development of a multi-tenant SaaS e-commerce platform (Laravel, Bagisto) serving **1,000+ active merchant storefronts**.
- Drove technical decisions, code review, and quality standards within a 5-person team.
- Shipped features across the stack: tenant onboarding, catalog, checkout, and admin tooling.

Team Leader & Full Stack Developer - Oyoun Media Aug 2022 - May 2025

Digital agency serving international enterprise clients · Palestine, hybrid

- Led a **9-person team** (4 Laravel, 2 React, UI/UX, 2 QA) delivering **15+ web projects** end-to-end for clients including **Samsung and Philip Morris**.
- Built Oyoun Academy: a multi-tenant, multi-database SaaS training platform - onboarded **10+ corporate-group academies and 10,000+ trainees** within its first year, with billing, access management, advanced reporting, and full Coursera catalogue integration.
- Ran sprint planning, code reviews, and technical delivery; worked directly with product owners and Europe-based client executives.

Independent Contractor & Freelance Developer Aug 2021 - Present

100+ projects for 50+ clients, part-time alongside full-time roles, via Supernova agency and direct clients - selected work:

Malsoon (Saudi Arabia) · Mar 2024 - Mar 2025

- Built a custom e-commerce platform with an **AI-powered WhatsApp assistant** handling in-chat ordering, product recommendations, order tracking, and support automation - client reported a **~70% sales increase within two months** of launch.

NewTags (Saudi Arabia) · Jan 2024 - Present

- Built the recruitment & certification HR platform for **Ala Khutah**, Saudi Arabia's national Hijrah-trail cultural experience - exams, quizzes, role hierarchies, and certification workflows supporting **~100,000 staff** nationwide, delivered on a tight deadline.
- Developed two SaaS products: **Eisar** (corporate training & development automation) and **Adhyaf** (Hajj journey guidance used by **thousands of pilgrims** per season); built payment-gateway and external API integrations.

Octavey (Saudi Arabia) · Dec 2023 - Aug 2024

- Backend and DevOps for **RETM** music streaming and e-learning platforms: subscriptions, billing, and permissions; managed AWS/DigitalOcean infrastructure with Docker, CI/CD, load balancing, horizontal scaling, and cost alerting.
